

To whom it may concern: I am writing to you concerning any proposed changes to rules concerning satellite radio.

As a user of xm and a profesional driver of 12 years and 2 million miles, accident free. I have come to value the service that xm provides and think that any change to the current rules would be a detrement to citizens. The service of traffic and weather has helped me with my day on several occasions.

A loss of this service would undermine the transportation network as we know it.

Please understand that if the FCC makes any changes to the rules further I and a large contingent of constituents will make changes in the next election.

We are upset about the recient witch hunt by the FCC on Howard Steren and Bubba, but will not tolerate any further misuse of office.

Sincerly

KT.
